

When you use Xero, your

business

cash

accounting

invoicing

life

time

is better.

1. Get paid more quickly

Invoice immediately or on-the-go. Invoices sent immediately, reminders sent automatically, late fees applied, follow up done....and your money comes in faster, while you spend time on other things. Fun things.

2. No more annoying little bits of paper

No more worrying about lost receipts, handwritten notes. Snap a photo on your phone, log it in, job done.

3. Records sent to your bookkeeper & accountant instantly

Xero allows your accountant to access the records you want them to have. No more compiling spreadsheets or finding paperwork. No more dreading that meeting with the accountant.

4. Quotes and proposals take seconds

Create and edit templates, email them to prospective customers, and let them click to pay

online.

5. Know when cash is coming in

Cash flow forecasts. Profit improvement. Xero will give you the info you need to buy that equipment or hire new employees. Faster.

6. More time for customer service

With all this being done in the background, you can actually chat to your customers - make sure they're happy, sort issues quickly, get feedback. And get more sales as a result.

7. More time for sales and marketing

You've also got time to start thinking about that new product or research. Do whatever you want, when you want to.
